

NILESH PARMAR

nileshpar835@gmail.com | +91 9016070514 | Github: [nileshpar835](#) | LinkedIn: [nileshpar835](#) | Surat, Gujarat

Machine Learning Engineer & MSc IT Student with multiple AI/ML projects built across MLOps, Generative AI, NLP, and full-stack AI applications, including deployed ML systems using PyTorch, FastAPI, AWS, MLflow, and Streamlit. Hands-on experience with LLMs, LangChain, RAG, Hugging Face, and cloud deployment. Seeking AI/ML, GenAI, or Data Science Internship/Junior roles — open to remote, hybrid, or on-site opportunities.

TECHNICAL SKILLS:

Programming & Development:

- **Languages & Frameworks:** Python, Scikit-Learn, TensorFlow, Keras, PyTorch, NLTK, Hugging Face Transformers, OpenCV, FastAPI, Flask, Streamlit.
- **Tools & Libraries:** Pandas, NumPy, Matplotlib, Plotly, Seaborn, PySpark, OpenAI API, REST APIs, GraphQL, Neo4j, Docker, GitHub Actions, CI/CD Pipelines.
- **Database Systems:** SQL, NoSQL, Vector Databases (Pinecone, Chroma DB).

Data Science & AI:

- **Core Skills:** Machine Learning, Deep Learning, Generative AI, LLMs (GPT, Gemini, LLaMA, Falcon, DeepSeek), Natural Language Processing (NLP), Time Series Analysis, Model Deployment, Prompt Engineering.
- **Frameworks & Tools:** LangChain, RAG (Retrieval-Augmented Generation), LlamaIndex, LangGraph, LangServer, AutoGen, AutoML.
- **Applications:** AI-Driven Process Automation, Predictive Modeling, Statistical Analysis, Big Data Technologies, Data Visualization.

Cloud & MLOps:

- **Platforms:** AWS (SageMaker, Lambda, Bedrock, EC2), Heroku.
- **Practices:** MLOps, LLMops, Cloud Machine Learning, MLflow, Orchestration Frameworks.

Management & Operations:

- Agile Methodologies, Microservices Architecture, Business Analysis, Product Management, Team Leadership, Stakeholder Management, Business Intelligence.

Communication & Collaboration:

- Strong in technical writing, effective communication, stakeholder engagement, and team collaboration, fostering a productive and inclusive environment.

Languages:

- Fluent in English and Hindi.

CERTIFICATIONS:

- INTRODUCTION TO TABLEAU - DATA CAMP
- PYTHON BASICS - HACKERRANK
- DATA ANALYSIS WITH PYTHON - FREECODECAMP
- INTERMEDIATE PYTHON - DATA CAMP

INTERSHIPS:

Python Developer Intern | Zapuza Technologies LLP | Remote |

- Developed and maintained backend components using Python, following clean coding and modular design principles.
- Implemented reusable and optimized Python modules, improving code maintainability and execution efficiency.
- Refactored legacy codebases using modular design principles, reducing code redundancy by **20%**
- Optimized backend modules and performed debugging that led to a **15% reduction** in runtime errors and improved execution efficiency by **10%**
- Collaborated with cross-functional teams using Git and GitHub for version control and code reviews.
- Gained hands-on exposure to real-world SDLC processes, agile workflows, and production-level coding standards.
- Strengthened problem-solving, logical reasoning, and backend architecture understanding through live projects.

ACADEMIC PROJECTS:

End-to-End Delivery Time Prediction (MLOps Project) | PyTorch, FastAPI, Streamlit, AWS, ZenML, MLflow | [Repo](#)

- Built a machine learning system to predict delivery time using real-world features like distance, traffic, and weather.
- Implemented and compared Linear Regression and Neural Network (MLP) models using PyTorch.
- Designed a full MLOps pipeline using ZenML for data ingestion, preprocessing, training, and evaluation.
- Integrated MLflow for experiment tracking and model comparison.
- Developed a FastAPI-based REST API for real-time predictions.
- Built an interactive UI using Streamlit for user input and visualization.
- Deployed the complete system on AWS EC2 using NGINX as a reverse proxy.
- Configured systemd services for auto-start and production-level deployment.

Intelligent PDF Question Answering System using RAG | Python, LangChain, ChromaDB, Sentence Transformers, Groq LLM, PyPDF, Scikit-learn | [Repo](#)

- Developed an end-to-end **Retrieval-Augmented Generation (RAG)** pipeline for semantic document search and intelligent question answering from PDF files.
- Implemented **semantic similarity search** using **Sentence Transformers embeddings** and **ChromaDB vector database** for context-aware retrieval.
- Built a document ingestion pipeline with **PDF parsing, chunking, metadata extraction, and vector storage** for efficient retrieval.
- Integrated **Groq LLM (Qwen3-32B)** to generate accurate responses using retrieved contextual information.
- Optimized document retrieval using **Top-K semantic search** and embedding-based ranking for improved answer relevance.

TrackIT | React.js, TypeScript, Recharts, Tailwind CSS, Zustand, Node.js, OpenAI (Function Calling) | [trackit-finance.vercel.app](#)

- An AI-powered personal finance intelligence platform built with a client-first architecture, Integrated OpenAI function calling to allow users to query data, reducing manual filtering time for users by an estimated **30%**
- enabling users to explore, filter, and sort financial data through rich visualizations and natural-language interactions for deeper financial understanding.

Event Management System | ASP.NET Core, SQL Server (SSMS) | [eventmanagementsystem-qn6i.onrender.com](#)

- Designed and developed a role-based web application for event organization and bookings.
- Implemented modules for venue management, event scheduling, payments, and reviews.
- Enabled automated customer notifications and post-event feedback handling.
- Streamlined event operations through centralized administration and reporting.

College Exam Portal – Online Examination System | Python, Django, PostgreSQL (SQLite), HTML, CSS, JavaScript | [examination-bmiit.onrender.com](#)

- Built a secure web-based online examination platform for educational institutions.
- Implemented role-based access for HOD, Faculty, and Students with secure authentication.
- Developed features for exam creation, automated grading, result tracking, and analytics dashboards.
- Designed a responsive UI to ensure a seamless exam-taking experience and deployed with database migrations

EDUCATION:

Master of Science in Information Technology | Uka Tarsadia University (*expected 2027*) - CGPA 7.37

Bachelor of Science in Information Technology | Uka Tarsadia University (*2025*) - CGPA 7.22

H.S.C. (Shree Sarda English Academy) - Percentage 50.57

S.S.C. (Maruti Vidhyalaya) - Percentage 67.33
